- + static
 - + img // images
 - + css // css files
 - + js // JavaScript files

Database Schema

Execution Plan

- Have a nice landing page with an 'enter' button
- Leads to homepage with most recent blog posts
- Log in option from footer
- Log in gives access to admin controls for each post
 - o Editing
 - o Deleting
- Can also add a new post

Notes

- User authentication using cookies (consider using session?)
- Only blog_post side implemented, haven't added support for new authors
- Current authentication only accepts the following:
 - o Email: admin@myblog.com
 - o Password: password
